

1. The EPA is responsible to for “governance” of everything pertaining to the new federal low lead legislation, including markings.
2. Unfortunately, they have left the issue of markings (or tags) to each individual manufacturer to depict that their product is in accordance with the new low lead legislation.
3. Accordingly, there is no uniformity across the industry.
4. Our exclusive import source has always marked their low lead product “LF.” One of our domestic suppliers has always marked their domestic low lead product “LF.” Our other source for domestic cast product has marked “L.” but they will be changing their markings to “LF” soon.

Merit’s **Import** Product Marked LF

Merit’s **Domestic** Product Marked LF (one of two sources)

Merit’s **Domestic** Product Marked L (second of two sources, to be changed to LF soon)
